Echo Six: Black Ops by Eric Meyer They are an International elite unit created by NATO to carry out missions where no other could hope to succeed. A mix of Seals, Delta Force, British SAS and French, German and Polish SpecOps operators. Led by a former Navy Seal, Lieutenant Abe Talley. This is Echo Six. Even before they finish training a crisis develops that requires their unique and bloody brand of soldiering. Hostages are about to die, facing execution at the hands of the scourge of the seas - pirates. The objective is inside Somalia. Al Qaeda has taken piracy under its control to fund their worldwide quest for terror and death in the name of Islam. Talley's unit is hastily transferred to a nuclear carrier patrolling the Arabian Sea. Echo Six is to go ashore, kill the pirates and rescue the hostages. Exfiltration will be via the advanced, super-silent Black Hawks of the secretive 160th Aviation Regiment. Yet plans can and often do go wrong. And this time is no exception. Fighting with an ill-prepared yet expert squad of operatives, Talley has to control the bitter rivalry of his own men as they close with the enemy. An enemy who is well equipped and well prepared for the coming attack. Behind him, his own commanders are riven by political infighting and personal agendas that threaten to tear his unit apart almost before it has got off the ground. And the mission rapidly expands to take in new and larger, more dangerous objectives. Echo Six:Black Ops is an exciting and bloodthirsty story of the fierce, no-quarters fighting of a NATO SpecOps unit.
