Power of Material/Politics of Materiality by Susanne Witzgall Materiality has emerged as a new focus for art, design, and architecture. Where there was once the belief that the form of a work offered more capacity to bestow meaning, “New Materialism” asserts the agency of material within the artistic process, enmeshed as it is within a web of relationships. For Power of Material—Politics of Materiality, editors Susanne Witzgall and Kerstin Stakemeier have brought together a diverse and interdisciplinary team of contributors to deepen the current discourse surrounding materiality. The contributors were participants at a lecture series held at the cx centre for interdisciplinary studies at the Academy of Fine Arts, Munich, and, the book presents the resultant discussions and experimental practices.
