The 7 Laws of Enough: Cultivating a Life of Sustainable Abundance by Gina LaRoche, Jennifer Cohen

The 7 Laws of Enough is about the most radical kind of change, at the personal, organizational, and societal level: a shift from scarcity to sustainable abundance. These seven principles, pioneered by leadership consultants Gina LaRoche and Jennifer Cohen, guide readers on a transformational journey of self-discovery, towards new leadership strategies and a renewed sense of fulfillment and purpose. It starts with law number one: stories matter. We are all living in the story of scarcity—the story that tells us we don't have enough. We want more and more, perpetuating a vicious cycle of consumption that lowers our own well-being and irreparably damages the Earth. This book is an invitation to live in another story, the story of sustainable abundance. The ripples from making this shift are profound—it will change your relation to your loved ones, your work, and the planet. Essential for spiritual seekers, business leaders, and environmentalists alike, The 7 Laws of Enough points the way towards a new way of living and leading.
